# Partnering with NatureBridge

By partnering with NatureBridge, you play a crucial role in connecting youth to the natural world.

We believe our dedication to developing the next generation of environmental stewards is more important than ever.

Investing in NatureBridge impacts the thousands of young people we serve each year support can help create a groundswell of youth engagement to protect our natural resources and treasures for years to come.

At NatureBridge, we are committed to:

**Experiential Education:** A leader in the field in overnight environmental science education, NatureBridge programs are guided by the latest research and a team of expert scientists and researchers.

**Increasing Access:** We believe every young person should have access to the outdoors and our programs, regardless of financial ability. We provide nearly 50 percent of participating schools with financial support.

**Social Emotional Learning:** We help young people develop knowledge, skills and character to grow into caring, inquisitive and informed adults.

**Inspiring Stewardship:** We are committed to creating new leaders and stewards who represent the diversity of our nation and who have the skills to advance their passion for championing the natural world.

## About NatureBridge

NatureBridge connects young people to the wonder and science of the natural world, igniting self-discovery and inspiring stewardship of our planet. NatureBridge offers overnight, environmental education programs to K-12 students in Yosemite and Golden Gate in California; Olympic in Washington state; and Prince William Forest in Virginia.

As the National Park Service's largest educational partner, our programs have changed the lives of more than 1 million students since 1971.

# Olympic National Park Programs

Since 1987, NatureBridge has connected students to the wonder and science of the natural world in Olympic National Park. During our three- to five-day overnight environmental science programs, students apply environmental science in a real-world setting from the shores of glacially-carved Lake Crescent to the peaks of Mt. Storm King.

Each year more than 4,000 K-12 students from over 100 schools participate in our environmental science programs aligned with state, federal and Next Generation Science Standards. The majority of our students attend public schools with nearly 80% of those students are from Washington State.

Olympic National Park provides an awe-inspiring classroom for students to investigate complex ecosystems from the Washington coast to old growth forests and alpine peaks. Motivated by their own curiosity, students investigate tidepools at the coast, collect and identify macroinvertebrates in Barnes Creek and study the adaptations of local mammals in our skins and skulls lab.

With the historic removal of two dams on the Elwha River, NatureBridge students have the unprecedented opportunity to witness and investigate the environmental changes occurring along the river. Students and teachers measure, sample and explore the Elwha River Restoration Project, contributing their work to the scientific research and long-term monitoring of the river's recovery.

# Evening on the Lake

## Event Details

Friday, March 6, 2020

Nordic Museum  
2655 NW Market St.  
Seattle, WA 98107

Join us for an exciting evening of drinks, delicious food, interactive breakout sessions and inspirational guest speakers.

For more information, please contact Katie Hopper, at [khopper@naturebridge.org](mailto:khopper@naturebridge.org) or 206-457-8334.

## Join Us

We strive to increase access to our programs through need-based scholarships for students and schools. Sponsorship of Evening on the Lake supports students of all socioeconomic and cultural backgrounds to participate in our three- to five-day, inquiry-based environmental science programs.

All net proceeds raised by the event help more children connect with nature, build character and become the environmental stewards of tomorrow.
