

NatureBridge

Connect to science + nature + self and others

Our **overnight environmental science programs** offer students from **grades 4-12** the opportunity to engage in inclusive, hands-on learning experiences while connecting to themselves, each other and the environment.

We **collaborate with each school or group** to ensure their program experience meets the needs of their students and their educational goals. Our curriculum supports NGSS and connects on-the-field studies back to the classroom.

NatureBridge environmental science educators bring our programs to life! **Our skilled and passionate educators** have a Bachelor's Degree or equivalent work and training experience, cleared background checks and are certified for safety.

Need-based **scholarships** are available to support students who qualify.

Why NatureBridge?

- Proven academic benefits
- Direct experience of scientific concepts in the field
- Mental, emotional, physical well-being
- Improved critical thinking and problem solving skills
- Improved behavior and peer relationships in school

Campus Locations

- Yosemite National Park
- Olympic National Park
- Golden Gate National Recreation Area
- Prince William Forest Park

“My inaugural year at NatureBridge was nothing short of amazing. It was a voyage into the heart of nature, filled with discovery and adventure.”

—NatureBridge Student

NatureBridge is proud to be the largest nonprofit overnight environmental education partner of the National Park Service.
